

# LAURA METAAL FABRICATIONS

Laura Metaal Fabrications  
produces high-quality products  
in series from hot-rolled steel.  
We can make anything for you!

Laura Metaal Fabrications is a manufacturer of steel products in series. We can make anything out of hot-rolled steel strip and plate. Try us!

## Quality

Of course, we are ISO 9001 certified. But the quality that we deliver goes much further than that. It boils down to supplying the complete product, without defects and on time. And that's a philosophy that has made us an A1 supplier to some of the world's most renowned companies. We constantly go the extra mile. And we make the most of it. For us, continuous improvement is an on-going process, overseen by our dedicated quality department.

## Flexibility

Our mission is to help you to create value for your customer. We supply you with exactly the right product at the right time. No request is too difficult – we simply look for what can be done. As part of the Laura Metaal Group, we have quick and easy access to all types of steel. This enables us to help you to reduce your lead times.

## Flexibility

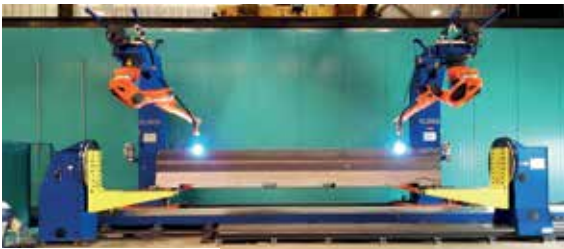

We have all the equipment needed to achieve perfect results – from laser cutting equipment and several high power press brakes to our own shot-blasting installation and milling stations. In fact, there is simply too much to mention here. For the details, take a look at our website:

[www.laurametaal.nl](http://www.laurametaal.nl).

## Steel People

We live and breathe steel. We believe that only highly skilled and motivated people can make the best products. And that's why we continuously invest in training our employees.

### Welding robot

- High efficiency
- Premium Quality

### Cutting

- Our punch laser machine ensures high efficiency
- Impeccable cutting surfaces on our largedimension Plasma and Oxy cutters

### Press braking and shearing

- High power press brake
- Up to 14.5 metres
- Heavy-duty shearing

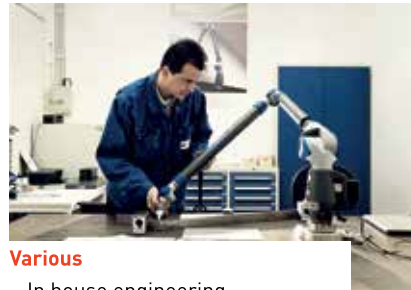

### Machining

- Large-dimension drilling and milling
- High-precision mechanical bevelling

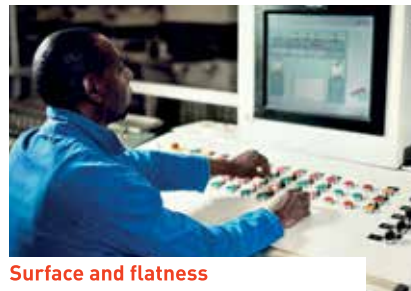

### Welding

- DIN and ISO 3834-2 certified MIG/MAG
- Submerged arc welding

### Various

- In house engineering
- In house measuring chamber
- Certified for remarking

### Surface and flatness

- In-house shot-blasting, pickling and oiling
- In-house levelling
- Long-life brilliance with our galvanising service
